|                         |       |

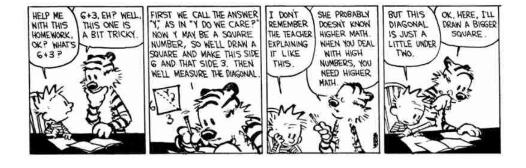

Do not turn this page until told to do so. You will have a total of 50 minutes to complete the exam. Unless otherwise stated, you **must** show all work to receive full credit. Unsupported or otherwise mysterious answers will **not receive credit.** If you require extra space, use the provided scrap paper and indicate that you have done so.

You may use a calculator **without a CAS** if you like, but a calculator is not necessary. NO PHONES ALLOWED.

Draw a fish on this page if you read these directions in full. Cheating of any kind on the exam will not be tolerated and will result in a grade of 0%.

| # | score | out of | #     | score | out of |
|---|-------|--------|-------|-------|--------|
| 1 |       | 2      | 7     |       | 9      |
| 2 |       | 5      | 8     |       | 12     |
| 3 |       | 5      | 9     |       | 15     |
| 4 |       | 5      | 10    |       | 15     |
| 5 |       | 6      | 11    |       | 20     |
| 6 |       | 6      | Total |       | 100    |

Remember: This exam has no impact on your worth as a human being. You got this!!!

| 1. | (a) State the Point-Slope form of a line passing through the point $(x_0, y_0)$ with slope $m$ .                   |
|----|--|
|    |  |
|    |  |
|    |  |
|    | (b) State the Slope-Intercept form of a line with slope $m$ and $y$ -intercept $b$ .                               |
|    |  |
|    |  |
| 2. | Let $f$ be a function and let $a < b$ be given. State the average rate of change of $f$ on the interval $[a, b]$ . |
|    |  |
|    |  |
|    |  |
| 3. | Given a quantity $P$ , state the relative change of the quantity from $P$ to $P'$ .                                |
|    |  |
|    |  |
|    |  |

| 4. | (a)        | State the | e form | of an  | exponential | function | of a | variable | t with  | initial  | value I | and and | base of | a:       |
|----|------------|-----------|--------|--------|-------------|----------|------|----------|---------|----------|---------|---------|---------|----------|
| т. | $(\alpha)$ | Duade dir | CIOIII | or air | CAPOHCHUM   | Tuncoron | Or a | variable | C WILLI | 11110101 | varue 1 | 0 and   | Danc (  | <i>.</i> |

$$P(t) = \underline{\hspace{1cm}}.$$

(b) The relative rate of change of P is

[Hint: If you don't recall the formula, this is just the relative change from P(t) to P(t+1).]

- (c) The function P models
  - (i) exponential growth when r is \_\_\_\_\_\_.
  - (ii) exponential decay when r is \_\_\_\_\_\_.
- (d) The continuous growth/decay rate is

$$k = \underline{\hspace{1cm}}$$
.

5. Let 0 < x, 0 < y be given. Fill in the blanks:

(i) 
$$\ln(1) =$$
 (iv)  $\ln(x^r) =$ 

(iv) 
$$\ln(x^r) = \underline{\hspace{1cm}}$$

(ii) 
$$\ln(xy) =$$
 \_\_\_\_\_\_ (v)  $\ln(e^x) =$  \_\_\_\_\_

(v) 
$$\ln(e^x) =$$
\_\_\_\_\_

(iii) 
$$\ln\left(\frac{x}{y}\right) =$$
 \_\_\_\_\_\_ (vi)  $e^{\ln(x)} =$  \_\_\_\_\_

(vi) 
$$e^{\ln(x)} =$$
\_\_\_\_\_

| 6. | (a) Find the slope of the line passing through the points $(\frac{1}{2},4)$ and $(1,3)$ |
|----|---|
|    |   |
|    |   |
|    |   |
|    | (b) Write the equation of this line in Point-Slope Form.                                |
|    |   |
|    |   |
|    |   |
|    | (c) Write the equation of this line in Slope-Intercept Form.                            |
|    |   |
|    |   |
|    | (d) Sketch a graph of $f(x)$ . Label the x-intercept and the y-intercept.               |

- 7. Let  $f(x) = x^2 2$ .
  - (a) Compute the average rate of change for f between x=3 and x=5.

(b) Give the Point-Slope form of the line that passes through (3, f(3)) and (5, f(5)).

(c) Give the Slope-Intercept form of the line from part (b).

| 8. | A biologist observes a population with initial size 81. In two years, the biologist returns to observe the population again and finds that only 9 remain. |
|----|---|
|    | (a) Find an exponential function for the size of the population as a function of $t$ years since the initial observation.                                 |
|    |   |
|    |   |
|    |   |
|    |   |
|    | (b) Does the function from part (a) model growth or decay?  |
|    | (b) Does the function from part (a) model growth of decay:  |
|    |   |
|    |   |
|    |   |
|    | (c) Use the model from part (a) to determine how many years it will take for the size of the population to reach 1.                                       |
|    |   |
|    |   |
|    |   |
|    |   |

| 9. | A bank is offering an money in this accounnearest year. | account that pay<br>nt, how long will | s 4% interest comp<br>it take for your i | oounded continuously.  nitial investment to d | If you decide to invest louble? Round to the |
|----|---|---------------------------------------|--|---|--|
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |
|    |   |                                       |  |   |  |

10. Sketch a graph of the function

$$f(x) = -2x^2 + 8x - 6.$$

Find the x-intercepts, the y-intercept, and the vertex. You may use your calculator to check your answer but you must show supporting work.

Hint: Given  $f(x) = ax^2 + bx + c$ , the formula for the vertex of the parabola is  $\left(-\frac{b}{2a}, f\left(-\frac{b}{2a}\right)\right)$ .

- (a) State the x-intercepts:
- (b) State the *y*-intercept:
- (c) State the vertex: \_\_\_\_\_
- (d) Sketch a graph:

11. A company hosts a weekly event. They find that 30 people attend at a ticket price of \$25, and 50 people attend at a ticket price of \$15. Assuming this relationship is linear, determine the ticket price that will generate the highest revenue. State the maximum revenue.

Hint: First, find the equation of the line representing the quantity of tickets sold, q, in terms of price, p.
